DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Readman et al.

Readman et al disclose a vibration isolator capable of use for a ceiling fan, and the vibration isolator comprising a stationary tube (12) having a bottom end, a diameter and a sidewall, a rotatable tube (10) rotatably connected to the stationary tube and having a top end and a sidewall, the top end of the rotatable tube rotatably connected to the bottom end of the stationary tube; a torsional damping device (18, 20) connecting the stationary tube to the rotatable tube to reduce torsional forces; and a compression spring (14) mounted between the bottom end of the stationary tube and the top end of the rotatable tube to reduce longitudinal vibrations.

Allowable Subject Matter

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Seifert et al., and Keiler et al. teach vibration isolators for ceiling fans.
